FARMOGERM -

THE STANDARD INOCULATION

That inoculation pays is now a matter of common knowledge, and it pays not only on lands that have not grown Legumes before, but on lands that have grown them as well. Read what the S. C. Commissioner of Agriculture

says in his 12th annual report:-

"From the result of the inoculation of various Legumes, the Commissioner is firmly of the opinion that it will pay all farmers to inoculate all Legumes, even when they are successfully grown, because of the great increase in nitrates supplied by high bred bacteria over that supplied by any germs natively present in the soil.

ALL INOCULATION IS NOT FARMOGERM

Because Formogerm was the first culture on the Market and is so widely known, many people refer to inoculation as "Farmogerm", but all cultures are by no means Farmogerm. Many other cultures are good when they leave the laboratory, but none of them keep good like Farmogerm, which slone can use the patented stopper which admits free access of filtered air, keeping the bacteria alive. Other concerns caution you not to use the culture after a certain time, but how many times are these instructions disregarded, and the culture used?

WITH FARMOGERM YOU RUN NO RISK

The culture is guaranteed perfectly virile whenever you use it It is of course possible to buy cheap cultures, but it is not possible to buy more bacteria for the same money. In other words, an acre of FARMOGERM contains more bacteria than many a five acre bottle of other cultures, and rather than use cheaper cultures, it would be better to use less Farmogerm, and then you would no doubt be getting more bacteria. As a rule a man doesn't get any more than he pays for, though big bottles and filler may try to make him think he does.

EVERY ACRE OF LEGUME SEED YOU SELL SHOULD MEAN AN ACRE OF FARMOGERM.

1 ACRE \$1.00 3 ACRES \$2.50 12 ACRES \$9.00 Less 35% to Merchants.

SEED GRAINS

Note the very low prices. We have a All from good crops which have been grown from selected seed-all carefully handled and put up in strong even weight Bags.

VEGETABLE SEEDS

For years one of the leading departments of our business has been the supplying of High Grade Garden Seeds to Truckers. On bulk orders to merchants we supply the same stocks as those used by these Truckers. These men demand and get absolutely the highest grade of seed to be had, and if you order MIXSON'S SEEDS you can get the same.

CYCLONE SEED SOWER

50 " " 68.25

Very Popular Seeder and Very Extensively

This sower is guaranteed to distribute seed perfectly evenly, and will not throw seed in an upward direction or against the operator, but direct and evenly to the land. Sows clover, timothy, red top or herds grass, alfalfa, oats, rye, wheat, millet, turnip and other varieties of farm seeds. It also distributes bone dust, land plaster and fertilizer to advantage. Clover seed is sown a width of 18 feet: timothy, 15 feet; alfalfa, 20 feet; wheat, 25 feet; millet, 18 feet; oats, 18 feet. Thus, it will be seen that one operator can sow from 40 to 60 acres per day, according to the kind of seed. Price \$2.00,

SEED POTATOES

Cobblers and Rose—Grown this Spring from our selected Maine Seed. Per bbl. \$3.50 These are all No. 2s and go much farther

in planting than the larger sized.

MIXCO LAWN GRASS SEED

This is a mixture of different grasses and clovers, and a continuous green lawn is the result. It makes a very quick showing and the lawn will be even fine and velvety. Only the very best seeds are used. Perfect preparation of the land is the first essential. Do not use Stable Manure unless you are sure it is well rotted, and even then some com mercial fertilizer is preferable.
